

# Trax-Buster

## Ice Film Neutralizer

Trax-Buster neutralizes and removes the harmful and unsightly white haze found on floors after using ice melting compounds. Protects and extends the life of any floor finish and restores its shine, gloss, and beauty. Prolongs the time period between 'strip-outs,' saving time, labor, and money. Use on hard floors or in extraction machines to remove sticky 'salt' residue from carpets and entrance matting. Ideal to remove ice melt residue from any surface exposed to ice melting and salt compounds. Use to neutralize and condition floors after stripping to ensure superior bonding and performance of floor sealers and coatings.

### DIRECTIONS

Read the entire label and SDS for proper use, handling and storage before using this product.

#### Ice melt neutralizing:

1. Add 1-2 oz. of Trax Buster per gallon of warm water.
2. Use clean mops and change mop water frequently. Use in automatic scrubbers or pressure washers at the same dilution ratio.

#### Floor conditioning:

1. After stripping the floor, add 1 oz. of Trax Buster per gallon of water during the final rinse.
2. Allow floor to dry before applying seal or finish.

### FAST FACTS

- Neutralizes harmful ice melt residue
- Prolongs the life/beauty of any floor
- Use on hard floors and carpets
- Use to neutralize salt residue on wood, concrete, and metal, including hydraulic lines
